Projections & break-even

The Problem

Expensive to Buy

A MacBook Pro costs 50,000+ THB. Most people only need it for a few weeks — not a lifetime.

Borrowing is Unreliable

Asking friends is awkward and uncertain. No guarantee of availability, condition, or accountability.

Gadgets Sit Idle

Owners have expensive devices collecting dust — depreciating in value while earning nothing.

70% of gadget owners report their devices sit unused for 3+ months per year

Who Faces This Problem?

🎓 University Students

- Need a MacBook for a project
- Can't afford a camera for coursework
- Short deadline, no time to buy

🎬 Creators & Freelancers

- Need specific gear per shoot
- Equipment changes per project
- Renting > buying for one-off gigs

💼 Professionals

- Need devices for short business trips
- Presentation equipment for events
- Don't want to travel with expensive gear

📷 Device Owners

- Gadgets sitting idle for months
- Missing passive income opportunity
- No trusted way to rent out devices

Our Solution

RentSync

A trusted peer-to-peer marketplace connecting gadget owners with renters for affordable short-term device access.

- 📋 List your device with price & dates
- 🔍 Renters search & book
- 📄 Digital rental agreement signed
- 💳 Secure payment & deposit held
- ⭐ Both parties rate after return

Rentable Categories

- 💻 Laptops
- 📷 Cameras
- 📱 Tablets
- 🎧 Audio
- 🎮 Gaming
- 🥽 VR / AR

Value Proposition

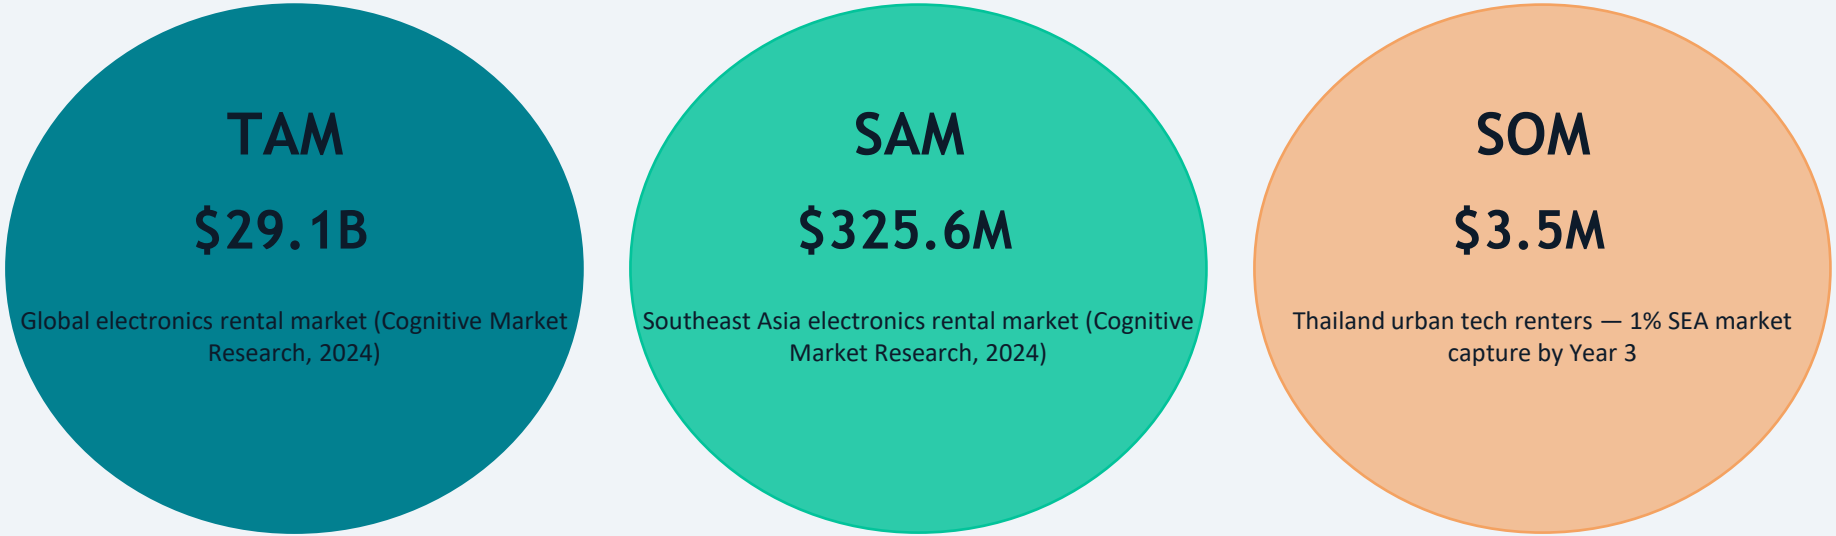

🔑 For Renters

- Access expensive tech without buying
- Flexible short-term rentals (daily)
- Verified devices & quality assurance
- 500 THB/day vs 50,000 THB purchase

💰 For Owners

- Earn income from idle devices
- Secure escrow payments & deposits
- Build reputation through ratings
- Full control over pricing & availability

Market Analysis

~1.55M
Thai university students (MHESI, 2023)

~7.4M
Active freelancers in Thailand (NESDC, 2025)

68%
Would rent tech vs buying (our survey)

500 THB
Daily rental willingness to pay (our survey)

Business Model

📦 Owners

- List gadgets
- Set price & dates
- Approve bookings
- Receive payment
- Build reputation

⚙️ RentSync Platform

- Identity verification
- Booking system
- Digital agreements
- Escrow payments
- Ratings & reviews
- Messaging system

🔍 Renters

- Search by category
- Choose rental dates
- Book & pay deposit
- Pick up & use device
- Return & review

💰 **Revenue: 12% transaction commission + Featured listings + Optional insurance add-on**

Revenue Model

12%

Transaction Commission

Platform takes 12% of every rental fee. Applied automatically at checkout. Main revenue driver.

e.g. 500 THB/day × 3 days = 1,500 THB → Platform earns 180 THB

150 THB

Featured Listings

Owners pay to boost their listing to the top of search results for 7 days.

e.g. 150 THB × 30 active owners boosting = 4,500 THB/month

5%

Insurance Add-on

Optional per-rental protection for damage or theft. Underwritten by third-party insurer.

e.g. 500 THB/day × 3 days = 1,500 THB rental × 5% = 75 THB fee

User Journey

🔍 Renter Flow

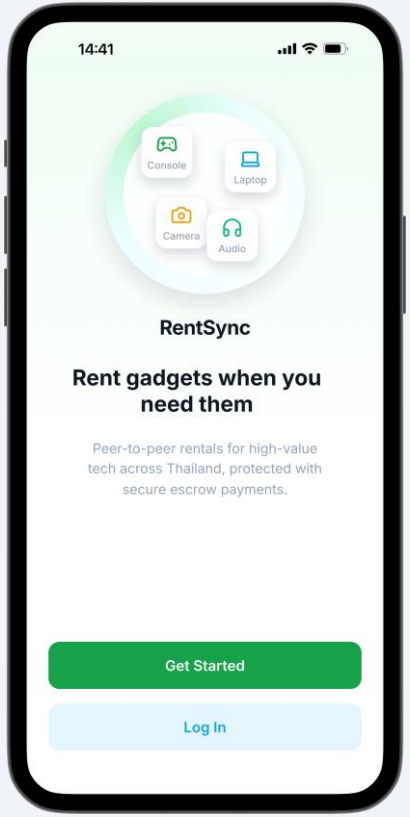

1	2	3	4	5	6	7	8	9	10
Sign Up & Verify ID	Search Device	Select Dates	Send Request	Owner Approves	Sign Agreement	Pay + Deposit	Pickup Device	Return Device	Leave Review

📦 Owner Flow

1	2	3	4	5	6	7	8	9	10
Sign Up & Verify	List Device	Set Pricing	Await Request	Approve/Decline	Agreement Signed	Hand Off Device	Device Returned	Receive Payment	Rate Renter

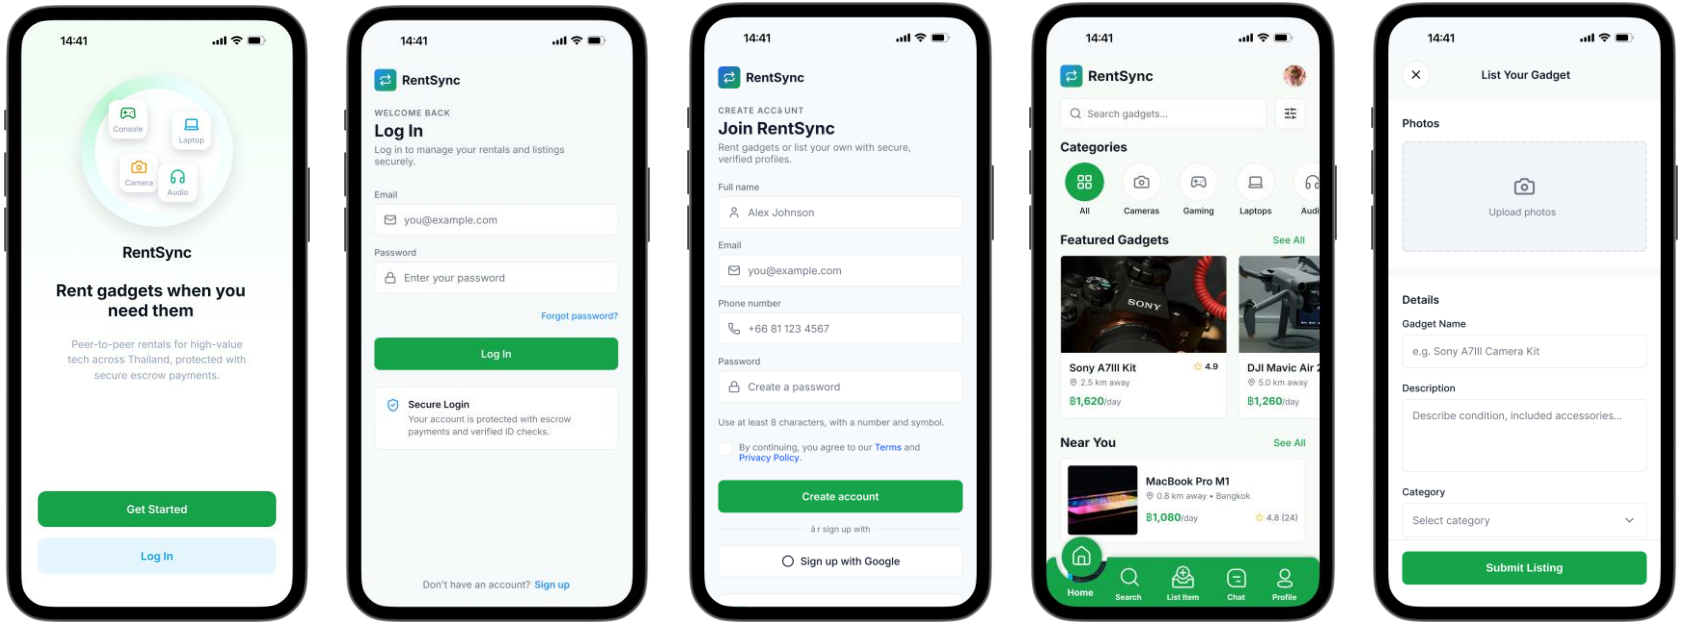

Deposit released to owner after safe return · Platform commission deducted automatically

Prototype

MVP — responsive design · Core flows: Browse → Book → Agree → Pay → Review

Prototype

✅ *Web-based MVP — responsive design · Core flows: Browse → Book → Agree → Pay → Review*

Trust & Safety

High-value devices require a high-trust platform. Every transaction is protected.

🪪 Identity Verification

All users must verify government-issued ID before their first transaction. Reduces fraud and builds accountability.

💰 Security Deposits

Renter pays a deposit (held in escrow) per rental. Released only after safe device return — protects the owner.

📄 Digital Agreements

Auto-generated rental contract per booking. Both parties must accept before payment proceeds — legally documented.

⭐ Ratings & Reviews

Mutual post-rental ratings build community reputation. Low-rated users are flagged — trust signals for everyone.

🔒 Escrow Payments

Rental fees are held by the platform until return is confirmed. No risk of payment disputes or fraud.

📋 Transaction Logs

All activity is logged: bookings, payments, agreements, and disputes. Full audit trail for every rental.

Validation

Testing our prototype and business model assumptions — 3 methods, 70 participants total

Online Survey

n = 50

84%
would use RentSync to rent a device

76%
own a gadget they'd consider listing

68%
willing to pay 400–600 THB/day for a laptop

Prototype Usability Test

n = 12

90%
completed the booking flow successfully

4.2/5
average ease-of-use rating

100%
could locate and browse devices without help

User Interviews

n = 8

5/5
renters said deposit system builds trust

3/3
owners want full control over pricing

Key
ID verification cited as #1 trust signal

Marketing & Growth Strategy

TOFU - Awareness

- Campus posters with QR codes at Assumption, Mahidol, Chula
- Facebook & LINE group posts in student communities
- 'Rent don't buy' short-form video content (TikTok/Reels)

MOFU - Consideration

- Trust content: how verification & deposits protect users
- Demo walkthrough videos of the booking flow
- User testimonials and prototype test results

BOFU - Conversion

- First rental credit: 50 THB discount for new renters
- Referral program: 100 THB credit per successful invite
- First listing bonus: Featured for free for 7 days

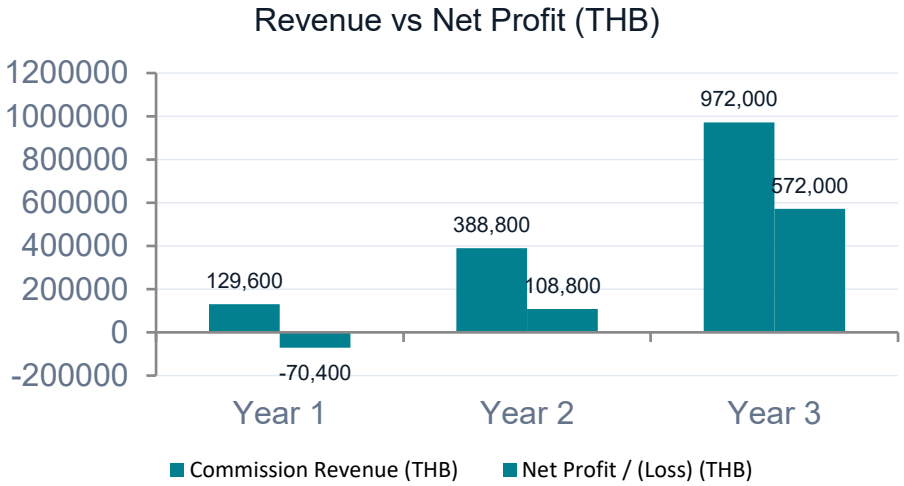

🎯 Growth Targets

Month 1: 50 signups	Month 3: 200 users	Month 6: 500 users	Year 1: 1,000+ users

Financial Projections

Key Assumptions

- Avg rental: 500 THB/day × 3-day duration = 1,500 THB/rental
- Platform earns 12% commission per transaction
- Renter growth: 200 → 600 → 1,500 users (Y1–Y3)
- 30% of renters complete 1 rental/month
- Device supply scales with user growth

Break-even: Month 14 (early Year 2)

	Year 1	Year 2	Year 3
Commission Revenue (THB)	**129,600**	**388,800**	**972,000**
Operating Costs (THB)	200,000	280,000	400,000
Net Profit / (Loss) (THB)	**(70,400)**	**108,800**	**572,000**

Risks & Mitigation

Risk	Severity	Mitigation Strategy
Device Theft	**High**	Identity verification + security deposit + digital agreement as legal evidence
Device Damage	**Medium**	Deposit covers repair costs. Optional insurance add-on for high-value items.
Fake Accounts	**High**	Mandatory government ID verification before first transaction. Manual review for flagged accounts.
Low Supply of Devices	**Medium**	Owner referral bonus. Campus ambassador program. Free featured listing for first-time listers.
Low Demand / Low Adoption	**Medium**	Renter discount for first rental. Community seeding at universities. Influencer partnerships.
Payment Disputes	**Low**	Escrow-based payment system. Platform mediates disputes with transaction log evidence.

Appendix A — Financial Calculation Detail

Metric	Year 1	Year 2	Year 3
Active Renters	200	600	1,500
Rentals / Renter / Month	0.3	0.3	0.3
Total Rentals / Month	60	180	450
Avg Rental Duration (days)	3	3	3
Avg Daily Price (THB)	500	500	500
Gross Rental Value / Month (THB)	90,000	270,000	675,000
Gross Rental Value / Year (THB)	1,080,000	3,240,000	8,100,000
Platform Commission Revenue (12%)	129,600	388,800	972,000
Operating Costs (THB)	200,000	280,000	400,000
Net Profit / (Loss) (THB)	**(70,400)**	**108,800**	**572,000**

Appendix B — Validation Evidence

📋 Online Survey

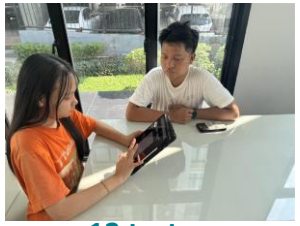

50 respondents

Google Forms distributed via Assumption University student groups and Bangkok freelancer Facebook communities. Covered rental intent, WTP, and feature prioritization.

Key Finding:

84% rental intent | 76% willing to list | 68% WTP 400–600 THB/day

🧪 Prototype Usability Test

12 testers

Moderated usability sessions with university students. Tasks included: browse, book, complete agreement, and review flow. Measured task completion and ease-of-use.

Key Finding:

90% task completion | 4.2 / 5.0 avg ease rating | Booking flow validated

🎙️ User Interviews

8 interviews

Semi-structured interviews with 5 potential renters and 3 device owners. Explored pain points, trust concerns, and negotiation of deposit expectations.

Key Finding:

Key insight: ID verification and deposit system were critical trust signals for both sides
